ELANCO* AH0470

PULMOTIL[®] AC (tilmicosin phosphate)
Aqueous Concentrate

ACTIVE CONSTITUENT: 250mg/mL TILMICOSIN (as tilmicosin phosphate)

Water medication for the treatment of pneumonia in pigs caused by *Actinobacillus pleuropneumoniae*, *Actinomyces pyogenes*, *Mycoplasma hyopneumoniae*, *Pasteurella multocida*, and other organisms sensitive to tilmicosin.

240mL [960mL]

Store below 30°C (Room Temperature) in a safe place. Protect from direct sunlight.

Shelf life of the opened bottle – 3 months.

Expiry Date

Batch Number

NRA Approval No: 55589/0203

SAFETY DIRECTIONS: Will irritate the eyes. Repeated exposure may cause allergic disorders. Avoid contact with skin and eyes. Wash hands after use. When opening the container and using the product, wear cotton overalls buttoned to the neck and wrist and a washable hat, elbow-length PVC gloves and goggles. After each day's use, wash gloves, goggles and contaminated clothing.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

DIRECTIONS FOR USE:

**RESTRAINTS:
FOR USE IN SWINE ONLY.
FOR ORAL USE ONLY.**

**Contra-indications:
Avoid allowing horses or other equines access to drinking water containing tilmicosin.
Avoid injecting this product, as it contains disodium edetate.**

**Precautions:
The safety of tilmicosin has not been established in boars intended for breeding purposes.**

**DOSAGE AND ADMINISTRATION:
Prepared medicated drinking water should be used within 24 hours of mixing.**

To be included in the drinking water at a dose rate of 200mg per litre (80mL Pulmotil AC per 100L water) for five consecutive days, to provide a daily dose of 15-20mg tilmicosin per kg bodyweight.

Tilmicosin has a bitter taste. Exceeding the registered dose rate may result in reduced water intake. Monitor water intake carefully whilst medicating with Pulmotil AC.

Any variation by the prescribing veterinarian to the approved dose, frequency, duration, route, disease or target species may require extending the approved withholding period.

WITHHOLDING PERIODS:

MEAT: DO NOT USE less than 7 days before slaughter for human consumption.

DISPOSAL: Dispose of empty container by wrapping with paper and putting in garbage.

PROTECTION OF THE ENVIRONMENT: Sludge from waste treatment ponds must be disposed of in approved landfills for contaminated wastes. This product may accumulate in soils. DO NOT spread effluent containing tilmicosin on the same pastures or croplands in successive years. DO NOT allow wastes from pigs treated with tilmicosin to enter waterways. These wastes contain tilmicosin which is highly toxic to algae.

Additional information is in the Material Safety Data Sheet.
